

# The Stanley E. Foster Construction Tech Academy

**“Building foundations  
for success,  
one student  
at a time.”**

From construction to computer-aided drafting, students at the Stanley E. Foster Construction Tech Academy (CTA) have the opportunity to utilize their hands as well as their minds. If you're interested in building and designing, you can explore careers in construction, architecture, and engineering with a hands-on, rigorous curriculum that will prepare you for direct entry into colleges, apprenticeships, or careers.

The small, nurturing learning community also allows for more student-teacher interaction and fosters the creation of a personalized environment where everyone is encouraged to learn and excel. You'll also be able to take advantage of multiple opportunities for job shadows, tours, and internships with businesses involved in the construction, architecture, and engineering industries. These opportunities will promote real world connections and expose you to a myriad of career opportunities.

Along with opportunities to participate in activities unique to CTA, students will also share in the full range of sports, extracurricular clubs and ASB programs at Kearny High Educational Complex. Upperclassmen will also have access to courses at Mesa College in our Fast Track Program and can simultaneously earn high school and college credits.

**As a student at CTA, you can take a variety of courses that explore technical and industry projects such as:**

- **Construction Technology**
- **Architecture and Design**
- **Principles of Engineering**
- **Computer Applications**
- **Computer Aided Drafting**
- **Manufacturing Technology**

If you're interested in using your mind as well as your hands, we encourage you to apply to CTA. Start building a strong educational and career foundation for your future, today.
