

A network of Asian and North American city education systems designed to collaboratively identify, examine, and adapt internationally benchmarked solutions to common problems of practice.

Denver

Hiroshima

Houston

Melbourne

Lexington

Seoul

Seattle

Shanghai

Toronto

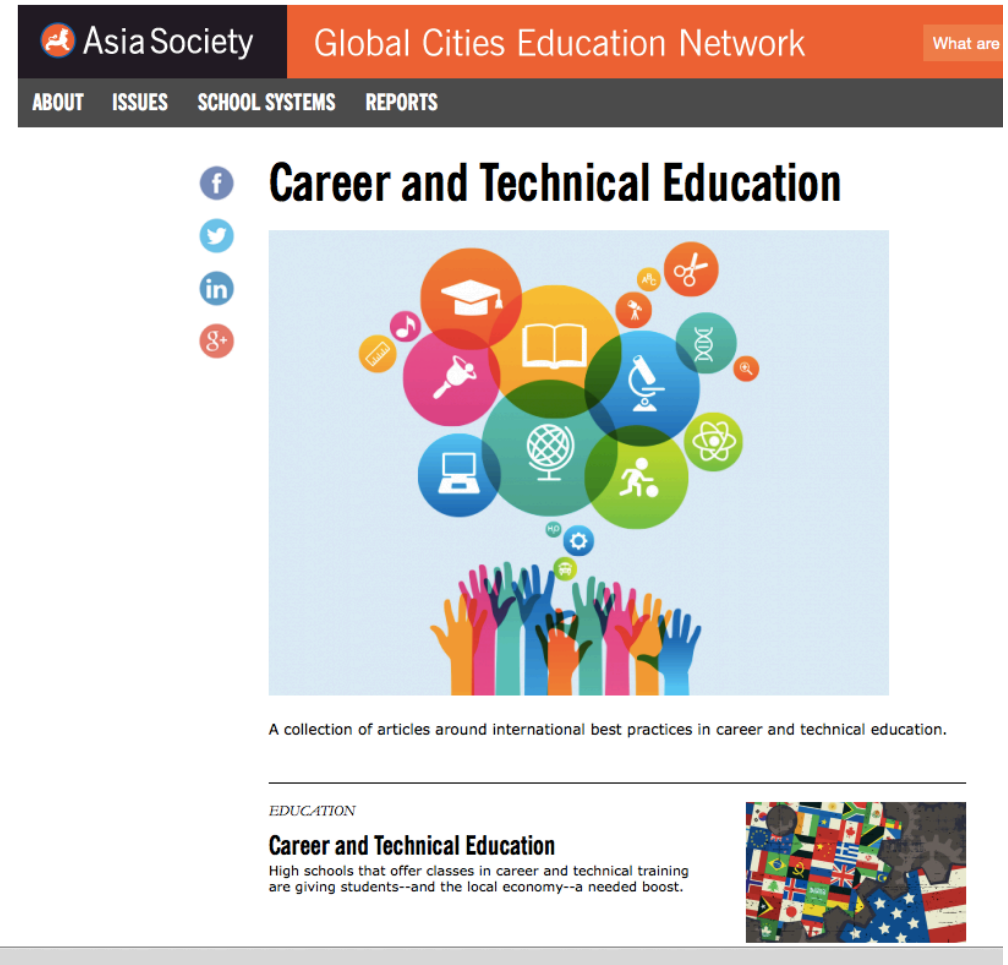

Singapore

Goals of Working Group on Vocational Education and Training (VET)

- To collaboratively develop knowledge drawn from GCEN cities and elsewhere on effective systems approaches to CTE/VET;
- For GCEN cities to use this knowledge to plan and develop an agenda for innovation and systemic improvements in their CTE/VET systems for all students; and
- To disseminate knowledge on effective policies and practices generated by the working group, including insights on “how cities learn” to adapt best practices to their context.

The screenshot shows the Asia Society Global Cities Education Network website. The header includes the Asia Society logo and the text "Global Cities Education Network" with a "What are" link. Below the header is a navigation bar with links for "ABOUT", "ISSUES", "SCHOOL SYSTEMS", and "REPORTS". The main content area is titled "Career and Technical Education" and features a large graphic of colorful hands holding up various educational icons. Below the graphic is a collection of articles around international best practices in career and technical education. A specific article titled "Career and Technical Education" is highlighted, with a sub-header "EDUCATION" and a brief description: "High schools that offer classes in career and technical training are giving students--and the local economy--a needed boost." The article is accompanied by a small image of a globe with flags.
