# Teens in School: Science of Adolescent Learning Lights Path for Student Success

Twenty-seven million—that is the approximate number of students who attend public middle and high schools across the United States. While the period of adolescence does not include only the middle and high school years, teenagers are a significant part of this stage of development. Adolescence can be thought of as beginning with a biological change—the onset of puberty—and ending with a social construct determined by factors like family, culture, and society.

By understanding the science behind adolescent learning and development, educators and school leaders can create learning environments that improve students’ academic outcomes, promote their social and emotional well-being, and support their overall success.

## How Latino Students Are Boosting the Nation’s Economy

Between 2000 and 2015, the percentage of Latino students enrolled in public elementary and secondary schools increased from 16 percent to 26 percent while the percentages of White students fell from 61 percent to 49 percent, according to the National Center for Education Statistics. As Latino students become a larger component of the K-12 student population, we must ensure they receive an education that prepares them for future success. In some ways we are—and they are delivering benefits to the economy in return—but in many other ways, we are not.

## Deeper Learning Digest: Keeping Pace with Tech Trends

Digital displays. High-voltage battery cells. Computer controls. Repairing a car is not what it used to be, so how are career and

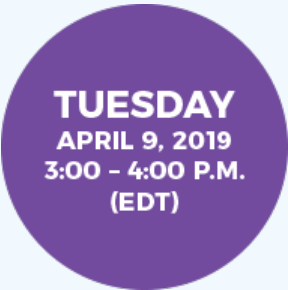

technical education programs (CTE) preparing students to keep pace with electric and self-driving vehicles?

### Why Now? Why Us? The Case for an Inclusive Vision of 21st Century Learning

Why now? Why us? The answer is simple: The world is changing rapidly, and there is no time to waste. We want to make sure that students with disabilities are being prepared for the realities of today and the challenges, opportunities, and possibilities of tomorrow. In this webinar, panelists will describe the urgency behind including students with disabilities in the vision of 21st century learning and what each of us—policy makers, practitioners, families, communities, and students—can do to make this a reality.

What’s in the **New Bill** to Rewrite  
**THE HIGHER EDUCATION ACT?**

House Democrats introduced legislation to rewrite the Higher Education Act while the Trump administration worked on regulations that could increase segregation in schools and decrease the number of students receiving free and reduced price lunch.
